

Your machine working again  
like the first day

## **Blumaq repair and maintenance service**

# Your equipment in expert hands

Blumaq workshop service, where expert hands repair the components your machine needs in order to perform again like the first day.

A good maintenance of the equipment is essential to avoid failures that may stop your work.

Blumaq mechanics are expert in construction and mining equipment to allow your machine to work always full performance.

At our Technical Center, a group of expert engineers will give you support so you will always be informed of the situation of your repair.

In Blumaq we think that quality comes from inside, that every part we develop, we repair or every maintenance service we give, must fulfil the highest quality standards so you can always have your equipment in perfect conditions.
