

Pure air
for your filter

Pre-Cleaners

Clean air for your engine.

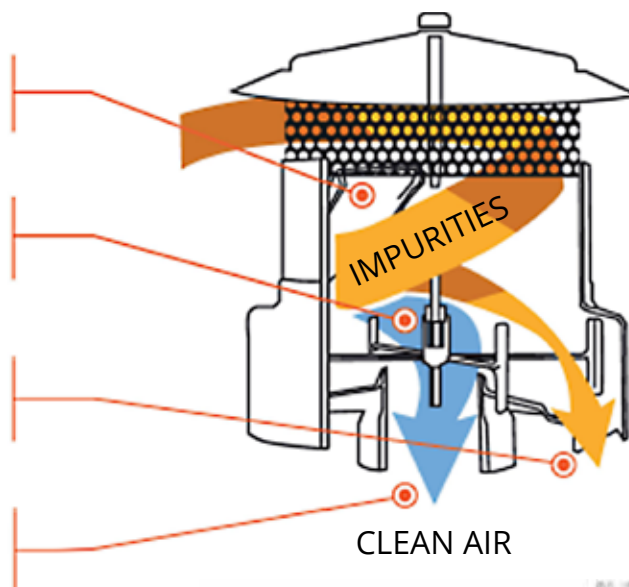

Blumaq provides a extensive range of primary and secondary filters, both in classical and radial systems.

The Blumaq pre-cleaner includes a blade specifically designed to push the air into the centrifugation turbine.

The centrifugal force separates contaminating elements such as dirt, water, dust, insects, etc., from the clean air.

A powerful high speed rotor expels dirt through the lateral openings.

Only pure clean air will reach your filter.
