Hydraulics

Blumaq, technology and experience at your service, with the widest range and the best guarantee in the market, because we are specialists.

Our engineers and technicians are specialized in hydraulic systems for construction and mining equipment. Our technicians work every day in the selection of components and in a thorough quality control process on our test bench. This process allows us to offer you maximum reliability and efficiency in each one of the components of the hydraulic system. Blumaq always guarantees an excellent performance so the working life of your machine is the longest possible, reducing the downtime for service thus making your equipment more cost effective and productive.

Cylinder:

Complete and spare parts for lift, tilt, steering, suspension cylinders, as well as spherical bearings, seals and every individual component.

Pumps and motors:

Wide range of hydraulic motors, pumps and their components, whether piston, gear or cartridge type. Designed and manufactured to satisfy the pressure and flow needs of the latest hydraulic systems.

Valves and accumulators:

Valves, regulators and accumulators with the exact specifications for optimal system operation.

Blumaq, technology and experience at your service, the widest range with the best guarantee in the market, because we are specialists.

Hoses and assemblies:

High, medium and low-pressure hoses with great flexibility and resistant to abrasion, couplings and all types of components. Wide range of detachable and non-detachable hose assemblies for the major name brands in the industry are available for immediate delivery.

Hydraulic filters:

Quality filters to keep the hydraulic system clean, wear and less repair for a higher performance and productivity.

Repair kits:

Incorporating the most advanced technology in the industry in both design and materials, so your hydraulic cylinders get maximum hydraulic power and reliability.
